AWS Certified Solutions Architect –
Associate

Gary Wright

Senior Web Developer (.NET, Angular, Node)

Altamont

Summary

I am a top-performing and creative full-stack web developer
with 8+ years of experience. I am highly skilled in developing,
maintaining, and testing web applications with C#, .NET, ASP.NET,
Angular, React, Node, Next, Tailwind CSS, MongoDB, PostgreSQL,
GraphQL, etc. I have expertise in building web pages, integrating
functionalities to websites, working with a team of designers and
software engineers to implement any ideas or changes, and
integrating 3rd party APIs according to project specifications.

Full Stacks:
- C#, .NET Framework, ASP.NET, C++
- Angular, React, Next, Node, Tailwind CSS, JavaScript, Typescript,
HTML, CSS
- RESTful API, 3rd party API integration
- MongoDB, PostgreSQL, MySQL

In my personal life, my other interests include music, sports, and
gaming.

_____

Experience

StarTele Logic
Senior Software Developer (.NET, ASP.NET, C++, Python)
2019 - 2021 (2 years)
New York, NY, United States

• Developed and maintained applications using Microsoft Technologies
including ASP .Net MVC, C#, WebAPI, SignalR, WPF, XAML, Entity
Framework, VB.Net, and MS SQL Server.
• Applied software expertise to develop solutions for various medical center
projects.
• Provided full stack development from server and operating system installation
to front-end user interface design.

Royal Media
Software Developer (.NET, Sharepoint, Azure. RESTful API)
2016 - 2018 (2 years)
New York, NY, United States

• Implementing modern technology to revitalize legacy software systems and web applications.
• Helping businesses hampered by software that no longer fits their needs.
• Reverse engineering and re-engineering older .Net code.
• Utilizing the ASP.Net MVC, WebAPI, and the Microsoft Stack to deliver solutions to clients "pain points" with older applications.

Primacy
Software Developer (Visual Studio, VC++, C#, .NET)
2013 - 2015 (2 years)
New York, NY, United States

• Responsible for maintaining, optimizing and adding new features to IOT/Edge software libraries and applications.
• Implemented, tested, and supported Clinc web platform features enabling customers to become self-serving by automating deployments of virtual assistants such as Amazon Alexa, Google Home, and Slack Messenger.
• Collaborated on team projects providing updates and information to leadership, project managers, sales, and marketing.

Airnauts.com
Software Engineer Intern (C++, C#)
2012 - 2012 (less than a year)
Nyack, New York, United States

• Summer internship for GLOBALFOUNDRIES Manufacturing Technology Software Architecture team. Worked directly with the chief software architect. Successfully completed a JBoss upgrade for factory systems which helped in reducing subscription costs and keeping the application platform current for several years.
